# Intelligence Artificielle

## Portraits ultra réalistes

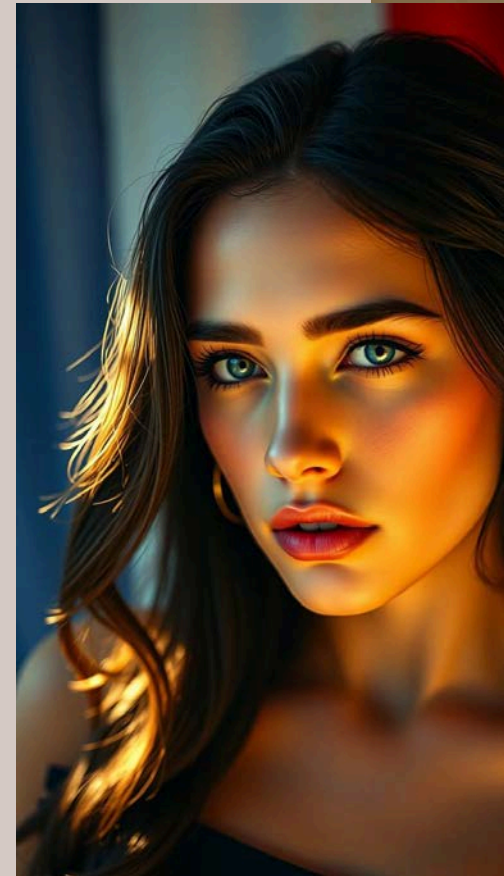

# Style 1 :

```
{  
  "subject": "close-up portrait of the original character with natural  
  expression, identity preserved perfectly",  
  "style": "documentary-grade realism, natural skin tones"  
  "camera": "Leica SL2 + APO-Summicron 90mm f/2, shallow DOF,  
  high micro contrast"  
  "lighting": "soft diffused window light from side, deep natural  
  shadow gradients, subtle highlight rolloff",  
  "skin_texture": "natural skin texture with pores, fine lines, peach  
  fuzz, subtle color shifts, realistic hydration shine"  
  "post_processing": "neutral color profile, light grain, minimal  
  sharpening, photojournalistic realism",  
  "background": "soft indoor blur, shallow depth-of-field"  
  "instructions": "Do not beautify or enhance face.  
  Maintain absolute identity. Only improve realism, lighting and detail  
  reproduction."  
}
```

## Style 2 :

{

"prompt": "A raw, candid 35mm film photograph portrait based on [image\_reference]. The person looks directly into the lens with a stoic, relaxed expression, facial muscles slack showing total calm. Soft natural side window light highlights extreme details: human skin pores and subtle cast shadows. Heavy film grain visible. Cinematic color grading, Kodak Portra 400 film stock. Realistic blurred interior home background.",

"negative\_prompt": "CGI, 3d render, illustration, painting, cartoon, smooth skin, airbrushed, photoshop, fear expression, screaming, panicked face, studio lighting, glossy finish, digital art, low resolution."

}

## Style 2b :

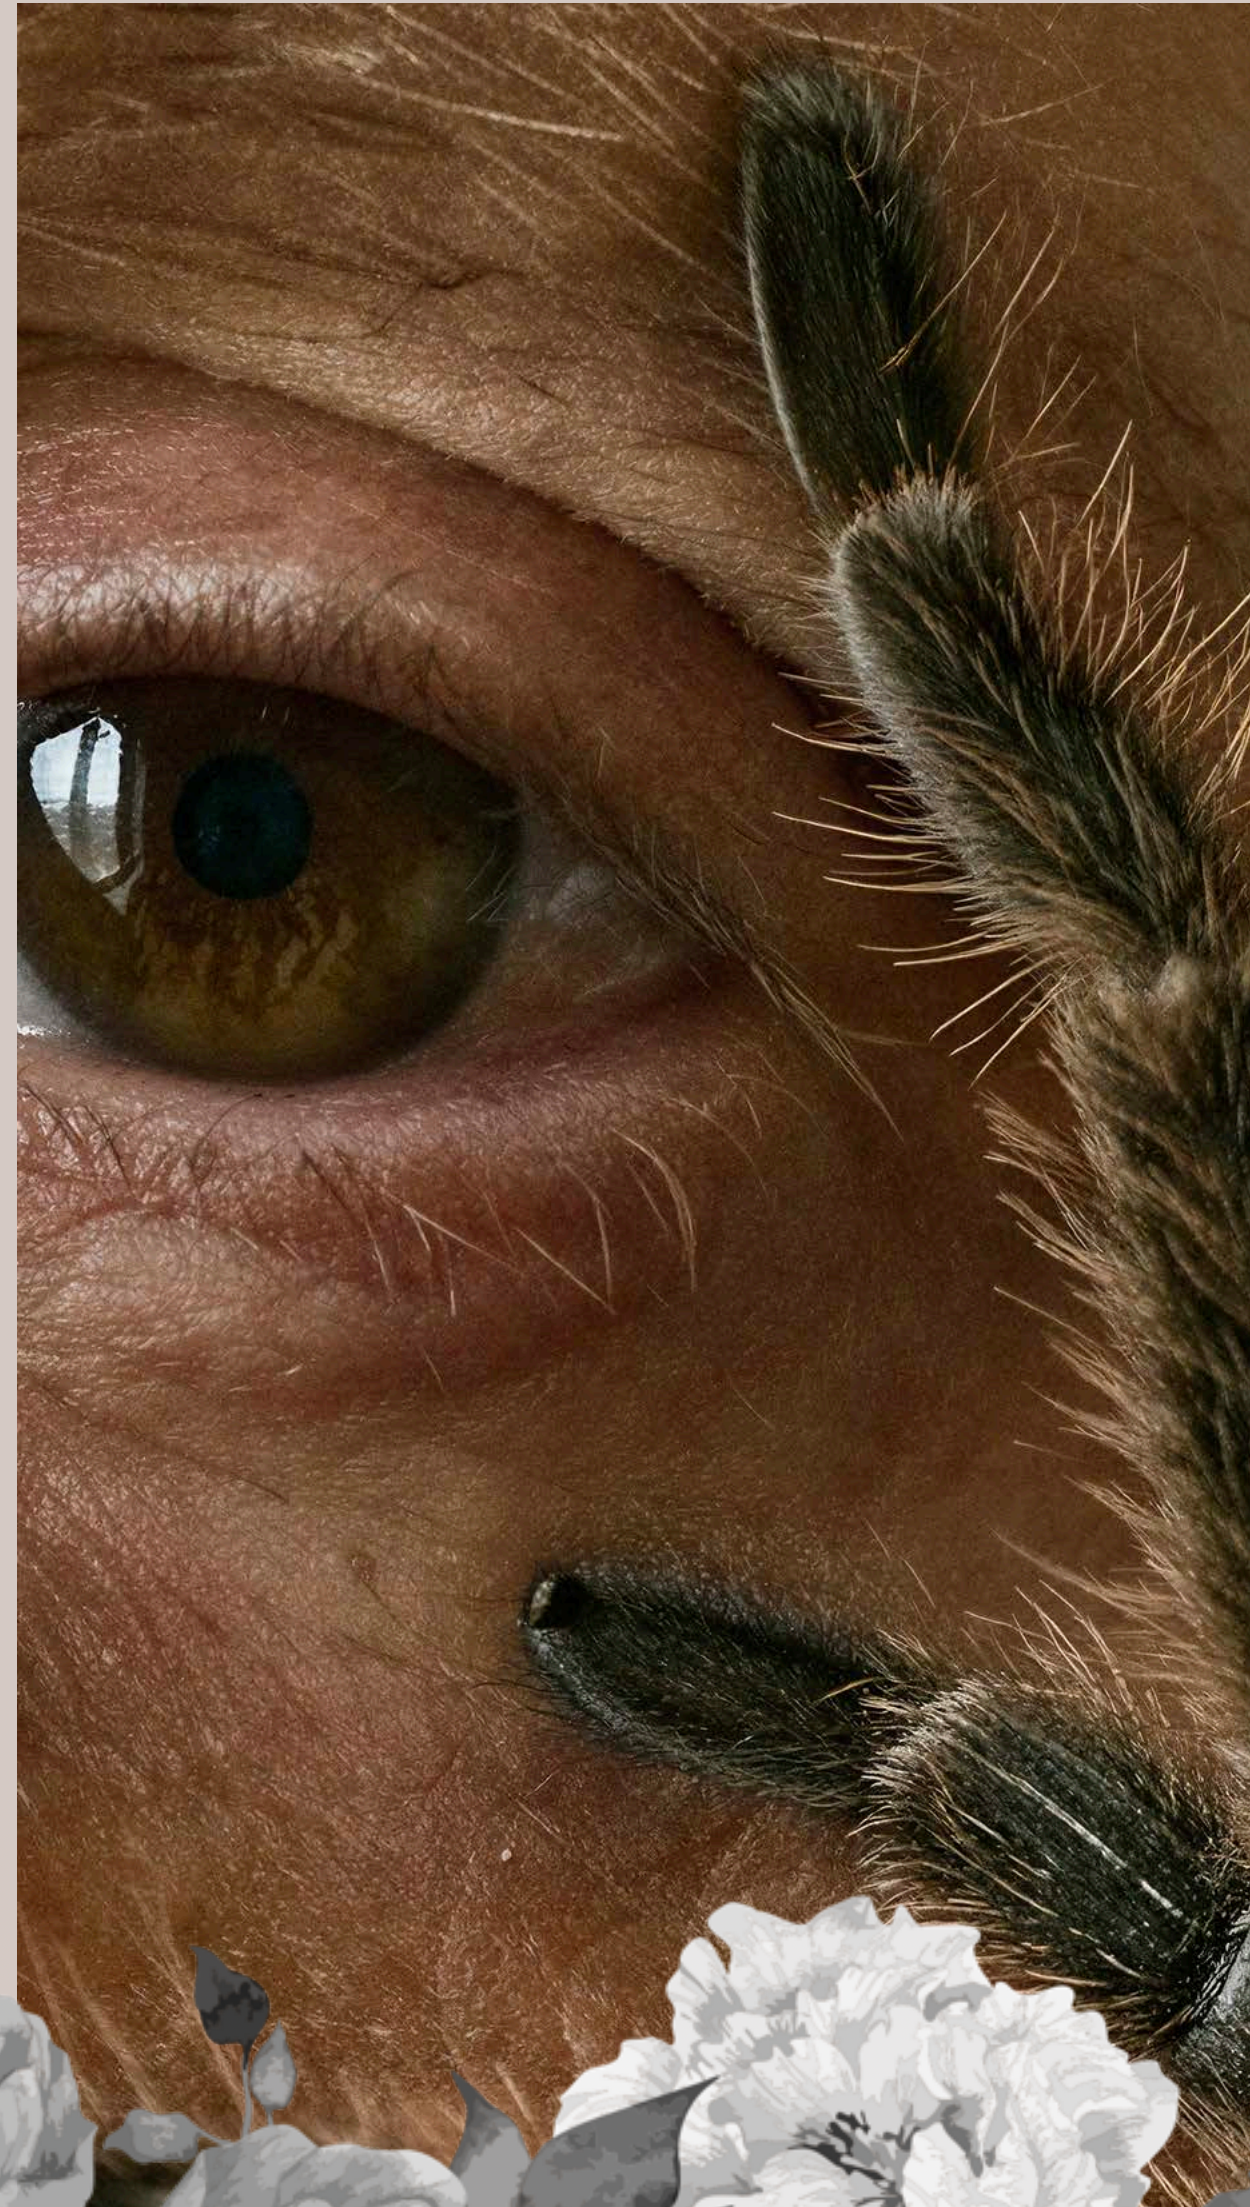

{

"prompt": "A raw, candid 35mm film photograph portrait based on [image\_reference]. The subject has a massive, deeply textured hairy Goliath birdeater tarantula resting calm on their cheek, legs gently touching the jawline. The person looks directly into the lens with a stoic, relaxed expression, facial muscles slack showing total calm. Soft natural side window light highlights extreme details: human skin pores, individual spider bristles, chitinous armor texture, and subtle cast shadows. Heavy film grain visible. Cinematic color grading, Kodak Portra 400 film stock. Realistic blurred interior home background.",

"negative\_prompt": "CGI, 3d render, illustration, painting, cartoon, fake spider, plastic spider, rubbery texture, toy spider, smooth skin, airbrushed, photoshop, fear expression, screaming, panicked face, studio lighting, glossy finish, digital art, low resolution.",

}

# Super Resolution

1. Magnific Skin enhancer (V1 creative / faithful)
2. Magnific Upscaler
3. Lightroom enhance / Super Resolution
4. Photoshop en quatre morceaux
5. Lightroom enhance / Super Resolution

# Soutenir la chaîne
